david m kreps has developed a text in microeconomics that is both challenging and user friendly the work is designed for the first year graduate microeconomic theory course and is accessible to advanced undergraduates as well placing unusual emphasis on modern noncooperative game theory it provides the student and instructor with a unified treatment of modern microeconomic theory one that stresses the behavior of the individual actor consumer or firm in various institutional settings the author has taken special pains to explore the fundamental assumptions of the theories and techniques studied pointing out both strengths and weaknesses the book begins with an exposition of the standard models of choice and the market with extra attention paid to choice under uncertainty and dynamic choice general and partial equilibrium approaches are blended so that the student sees these approaches as points along a continuum the work then turns to more modern developments readers are introduced to noncooperative game theory and shown how to model games and determine solution concepts models with incomplete information the folk theorem and reputation and bilateral bargaining are covered in depth information economics is explored next a closing discussion concerns firms as organizations and gives readers a taste of transaction cost economics

a short rigorous introduction to intermediate microeconomic theory that offers worked out examples tools for solving exercises and algebra support this book takes a concise example filled approach to intermediate microeconomic theory it avoids lengthy conceptual description and focuses on worked out examples and step by step solutions each chapter presents the basic theoretical elements reducing them to their main ingredients and offering several worked out examples and applications as well as the intuition behind each mathematical assumption and result the book provides step by step tools for solving standard exercises offering students a common approach for solving similar problems the book walks readers through each algebra step and calculation so only a basic background in algebra and calculus is assumed the book includes 140 self assessment exercises giving students an opportunity to apply concepts from previous worked out examples topics covered include consumer

theory substitution and income effect welfare gain or loss from a price change and choice under uncertainty shifting to a firm theory the book discusses production functions cost minimization perfectly competitive markets and monopolies two chapters on game theory provide building blocks for subsequent chapters that treat imperfect markets games of incomplete information and auctions contract theory and externalities public goods and common pool resources the book is suitable for use in undergraduate intermediate microeconomics courses rigorous introduction to microeconomics courses and managerial economics at the masters level

this workbook is designed as a support material to standard micro economics textbooks the new updated edition provides a specific focus on applications proposes supplementary questions as well as new problems taken from the exam papers of the last few years the questions and exercises in the workbook cover the topics discussed in standard microeconomics courses this workbook is the result of the teaching experience the authors have been developing for the last 15 years and aims at helping students and teachers to translate theory into practice the printed material is supported by supplementary digital material

people pursue their own interests whatever those interests might be some people have interests that are narrow and selfish while others have interests that are broad and altruistic the idea that people are self interested underpins all of economic analysis and raises two fundamental questions 1 how do people choose the actions they think will further their own interests 2 can the potentially conflicting interests of different people be made to mesh in some sort of socio economic equilibrium this book is devoted to a detailed study of the first question its companion volume economy wide microeconomics equilibrium optimality applications and tests makes a detailed study of the second question following some foundational remarks this book studies the arrow debreu theory of consumer choice that theory supposes people choose so as to maximize a complete continuous transitive and reflexive binary preference relation over a non empty and compact choice set the book then studies numerous refinements generalizations and extensions of each of these restrictions up to and including recent work on behavioral theories of choice and choice behaviour when preferences are intransitive incomplete discontinuous also considered is choice behaviour in environments that are not necessarily compact a study is also made of intertemporal choice and choice under uncertainty the study of arrow debreu choice theory and its extensions are presented from the primal dual and

revealed preference points of view consumers are not the only agents in the economy as producers are present as well beginning with a study of the arrow debreu idea that producers choose from a convex production set so as to maximize profit the book considers extensions and generalizations of this framework particularly to non convex environments the study is presented from the primal and dual points of view the final chapter in the book provides a link to its companion volume the chapter indicates how the theories of consumer and producer choice studied here help inform answers of the second question posed above resources are available to instructors who adopt this book more details at [worldscientific.com/worldscibooks/10\\_1142\\_12789\\_sm](http://worldscientific.com/worldscibooks/10_1142_12789_sm)
